

# DBCP

Drifting Buoy (DB)

Variables:

SST, Sea level atmospheric pressure, Wind vector, Salinity, Waves, Air temperature, Relative Humidity

Real Time

# DBCP

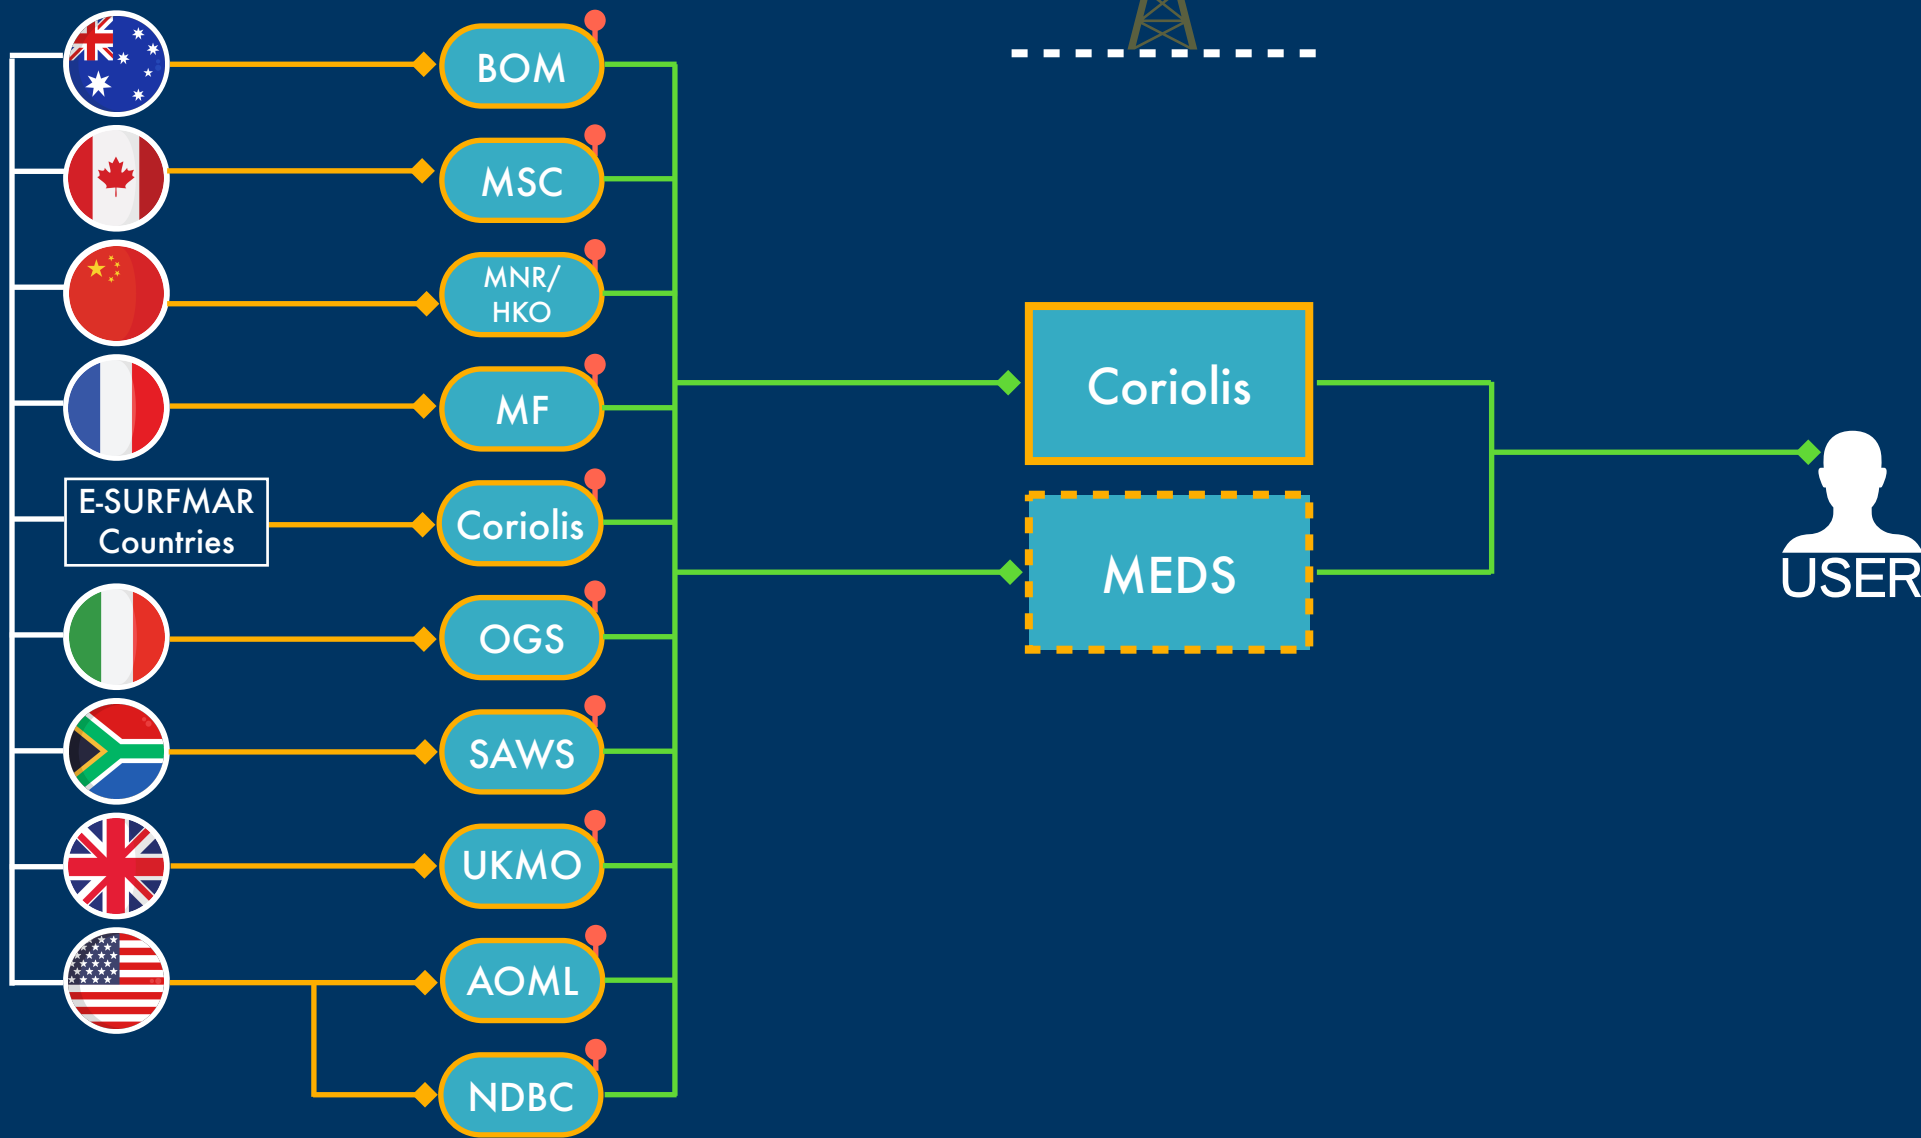

Drifting Buoy (DB)

Delayed Mode

## Contributing Members

## National Data Acquisition Center

## Global Data Distribution

Variables:

SST, Sea level atmospheric pressure, Wind vector, Salinity, Waves, Air temperature, Relative Humidity

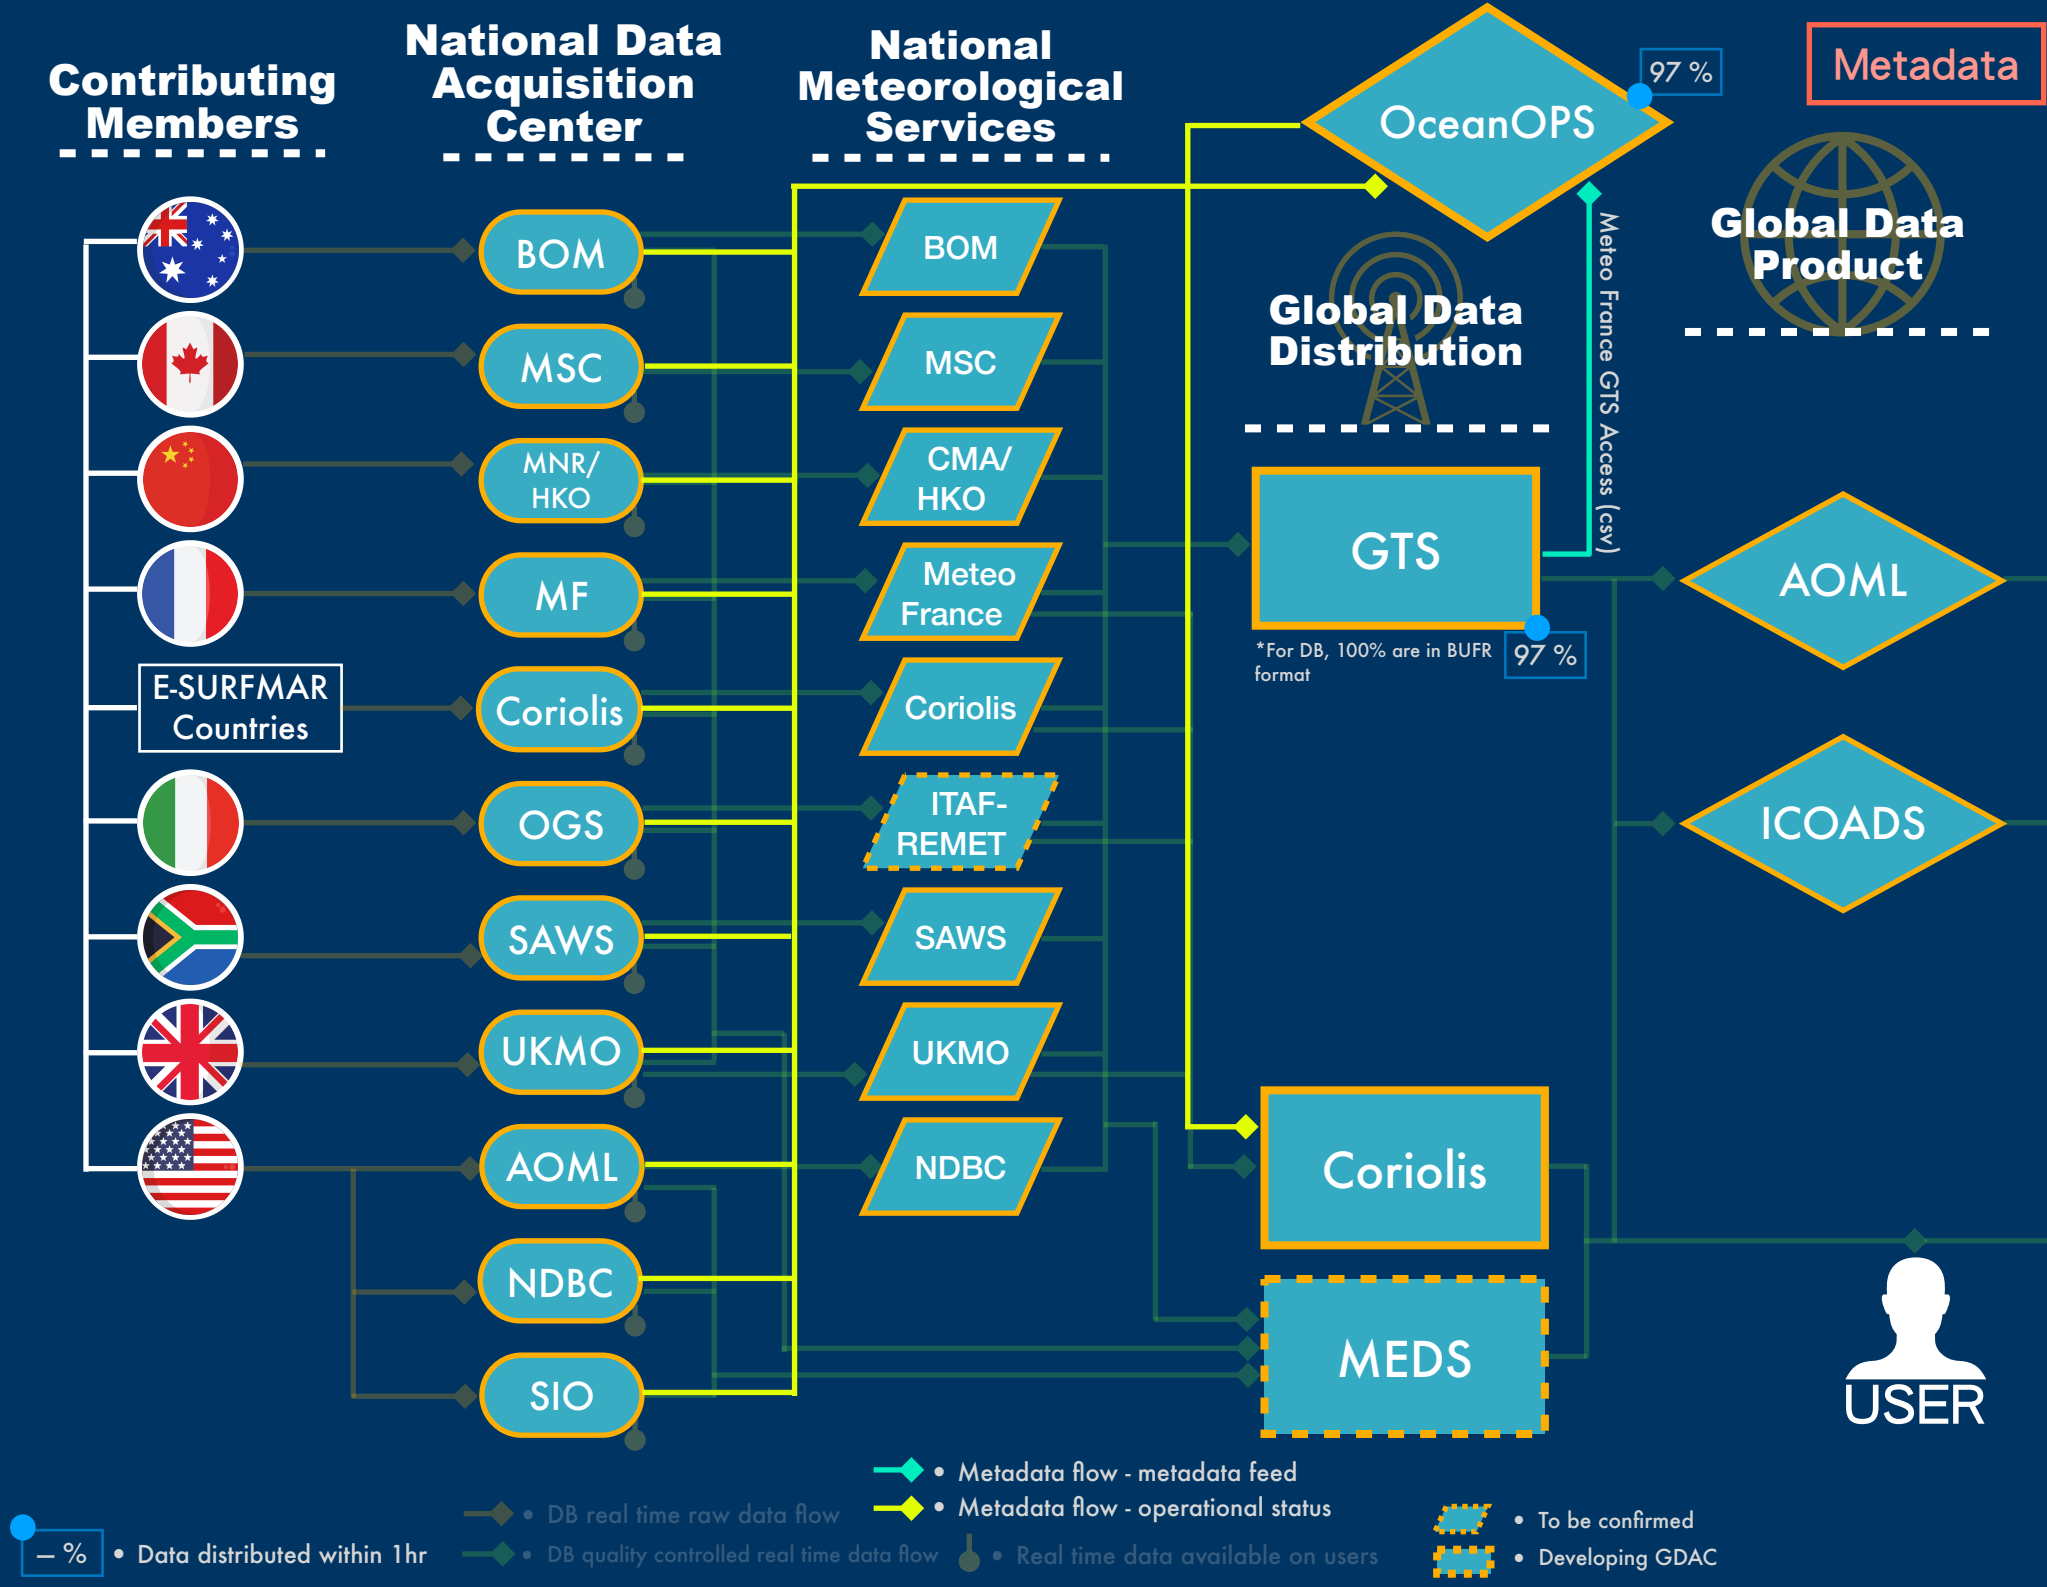

- % • Data distributed within ??
- % • Completeness of meta data
- ◆ • DB delayed mode raw data flow
- ◆ • DB quality controlled delayed mode data flow
- • Delayed mode data available on users
- Developing GDAC

# DBCP

Drifting Buoy (DB)

Variables:

SST, Sea level atmospheric pressure, Wind vector, Salinity, Waves, Air temperature, Relative Humidity

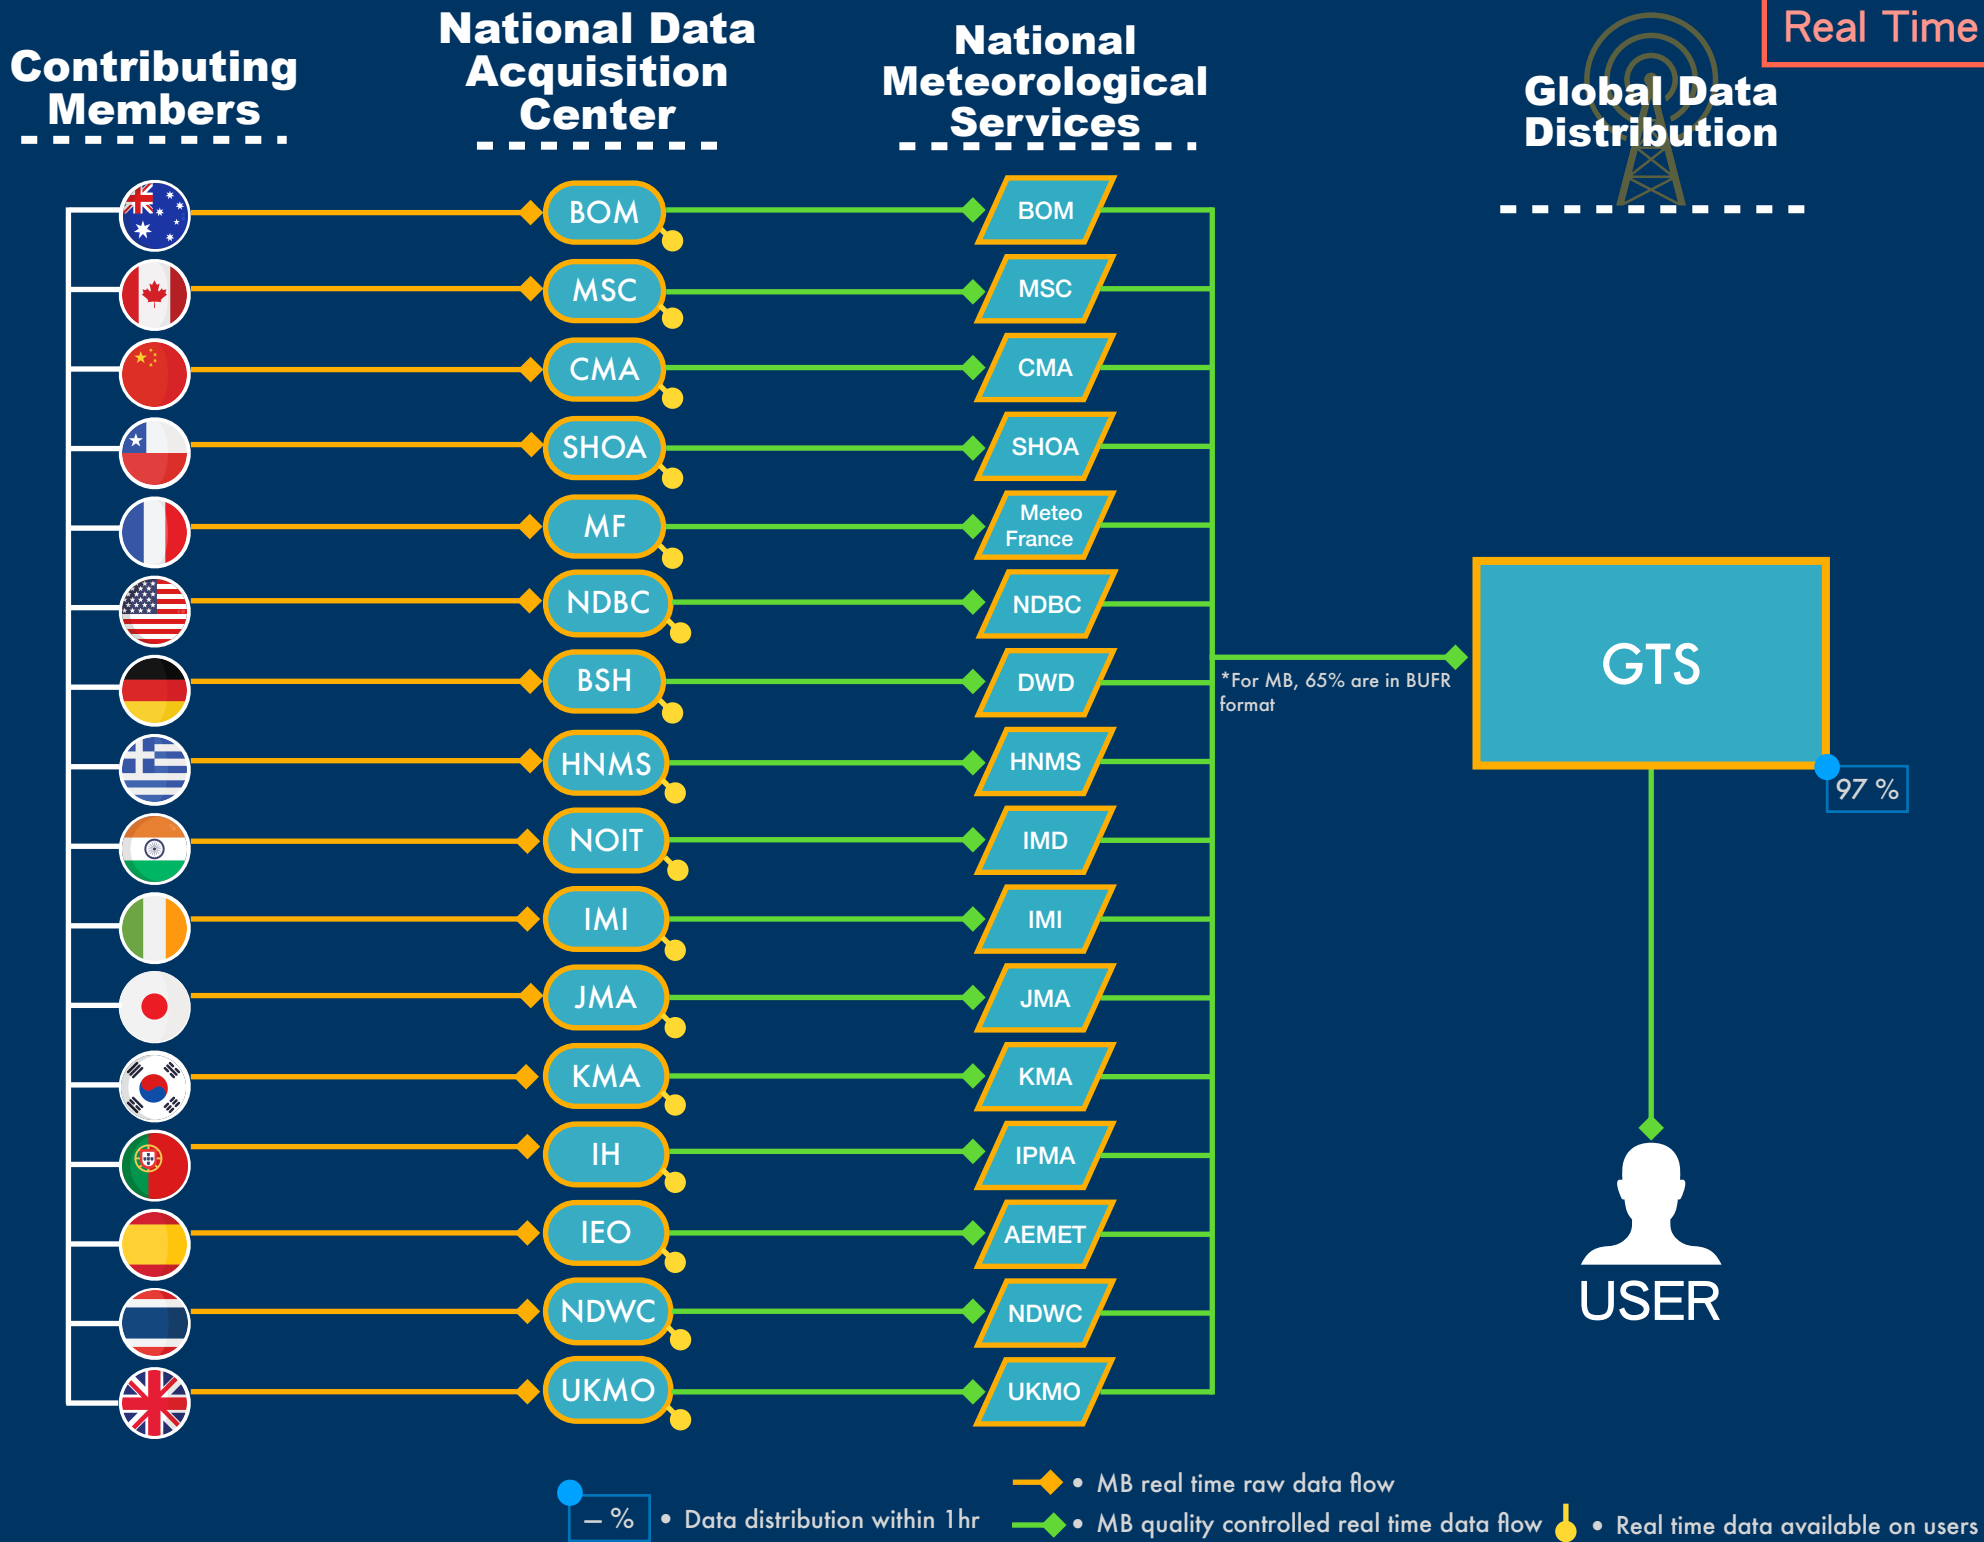

# DBCP

Moored Buoy (MB)

Variables:

SST, Sea level atmospheric pressure, Wind vector, Salinity, Waves, Air temperature, Relative Humidity

Real Time

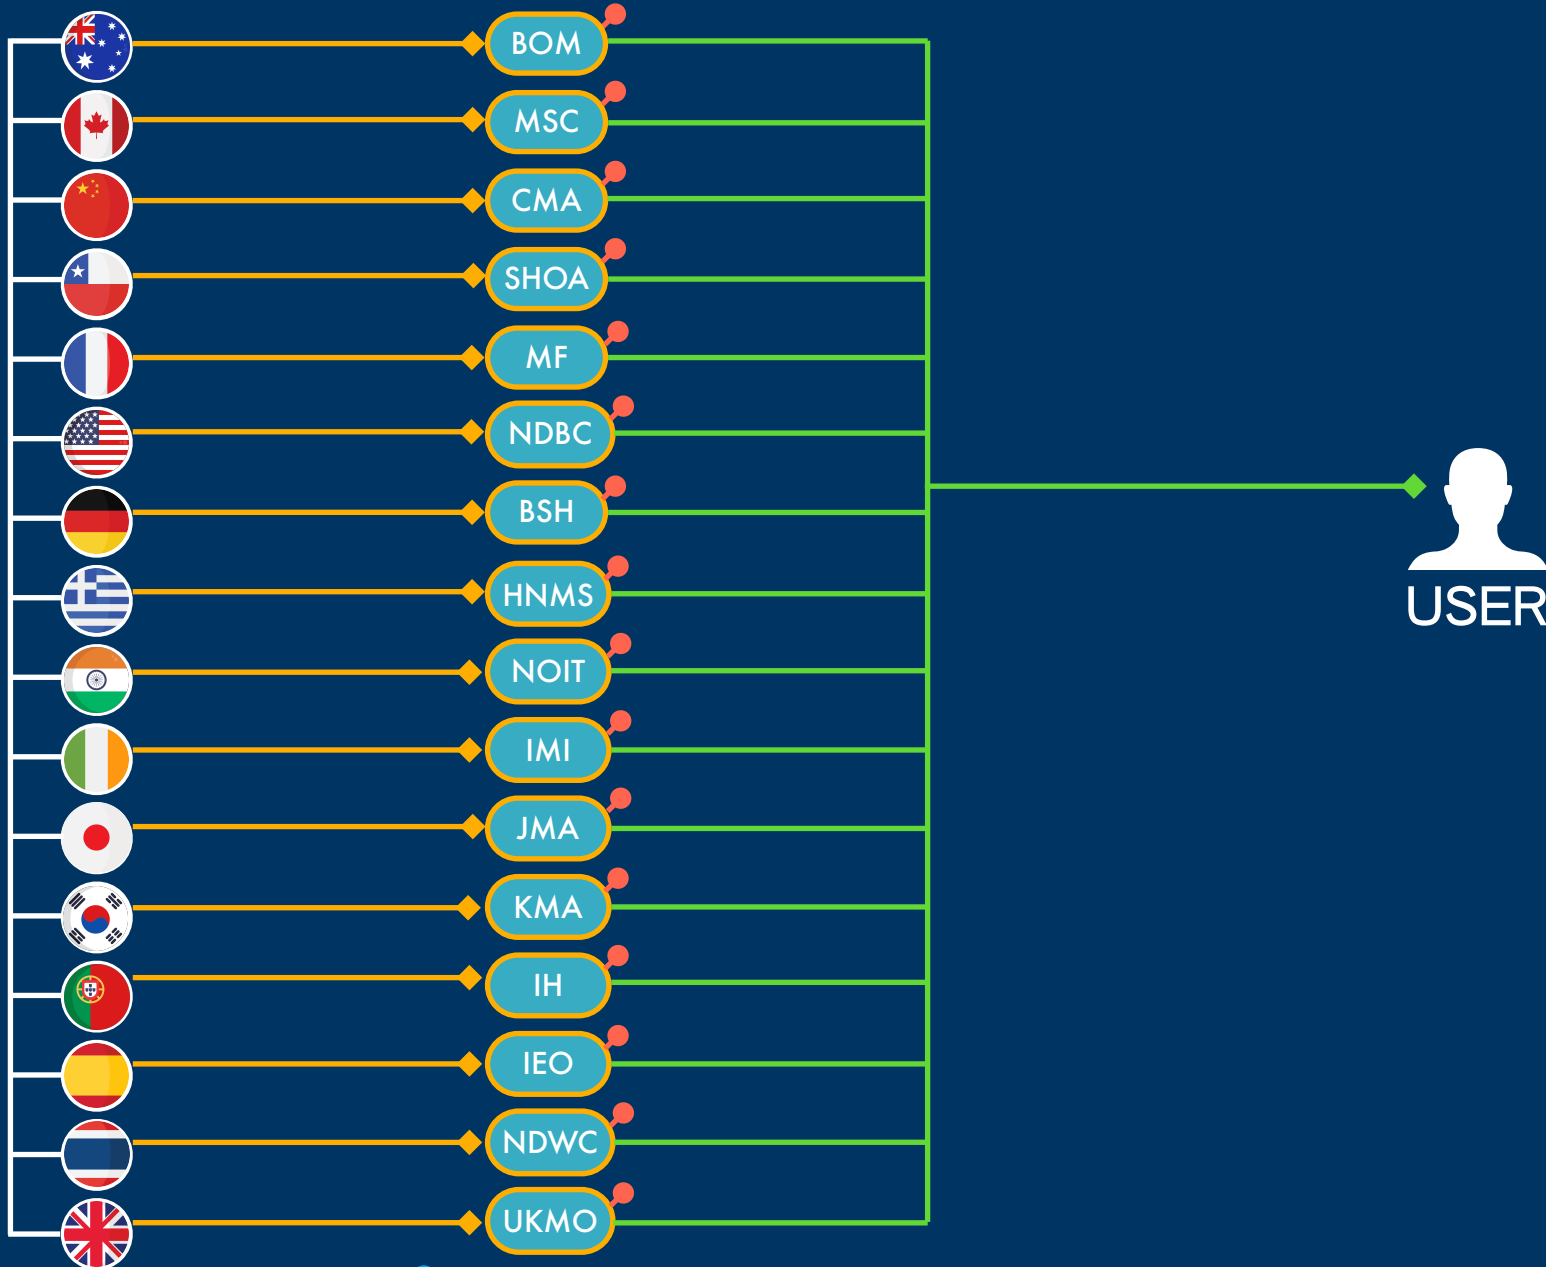

# DBCP

Delayed Mode

Metadata

## Global Data Distribution

\* For MB, 65% are in BUFR format

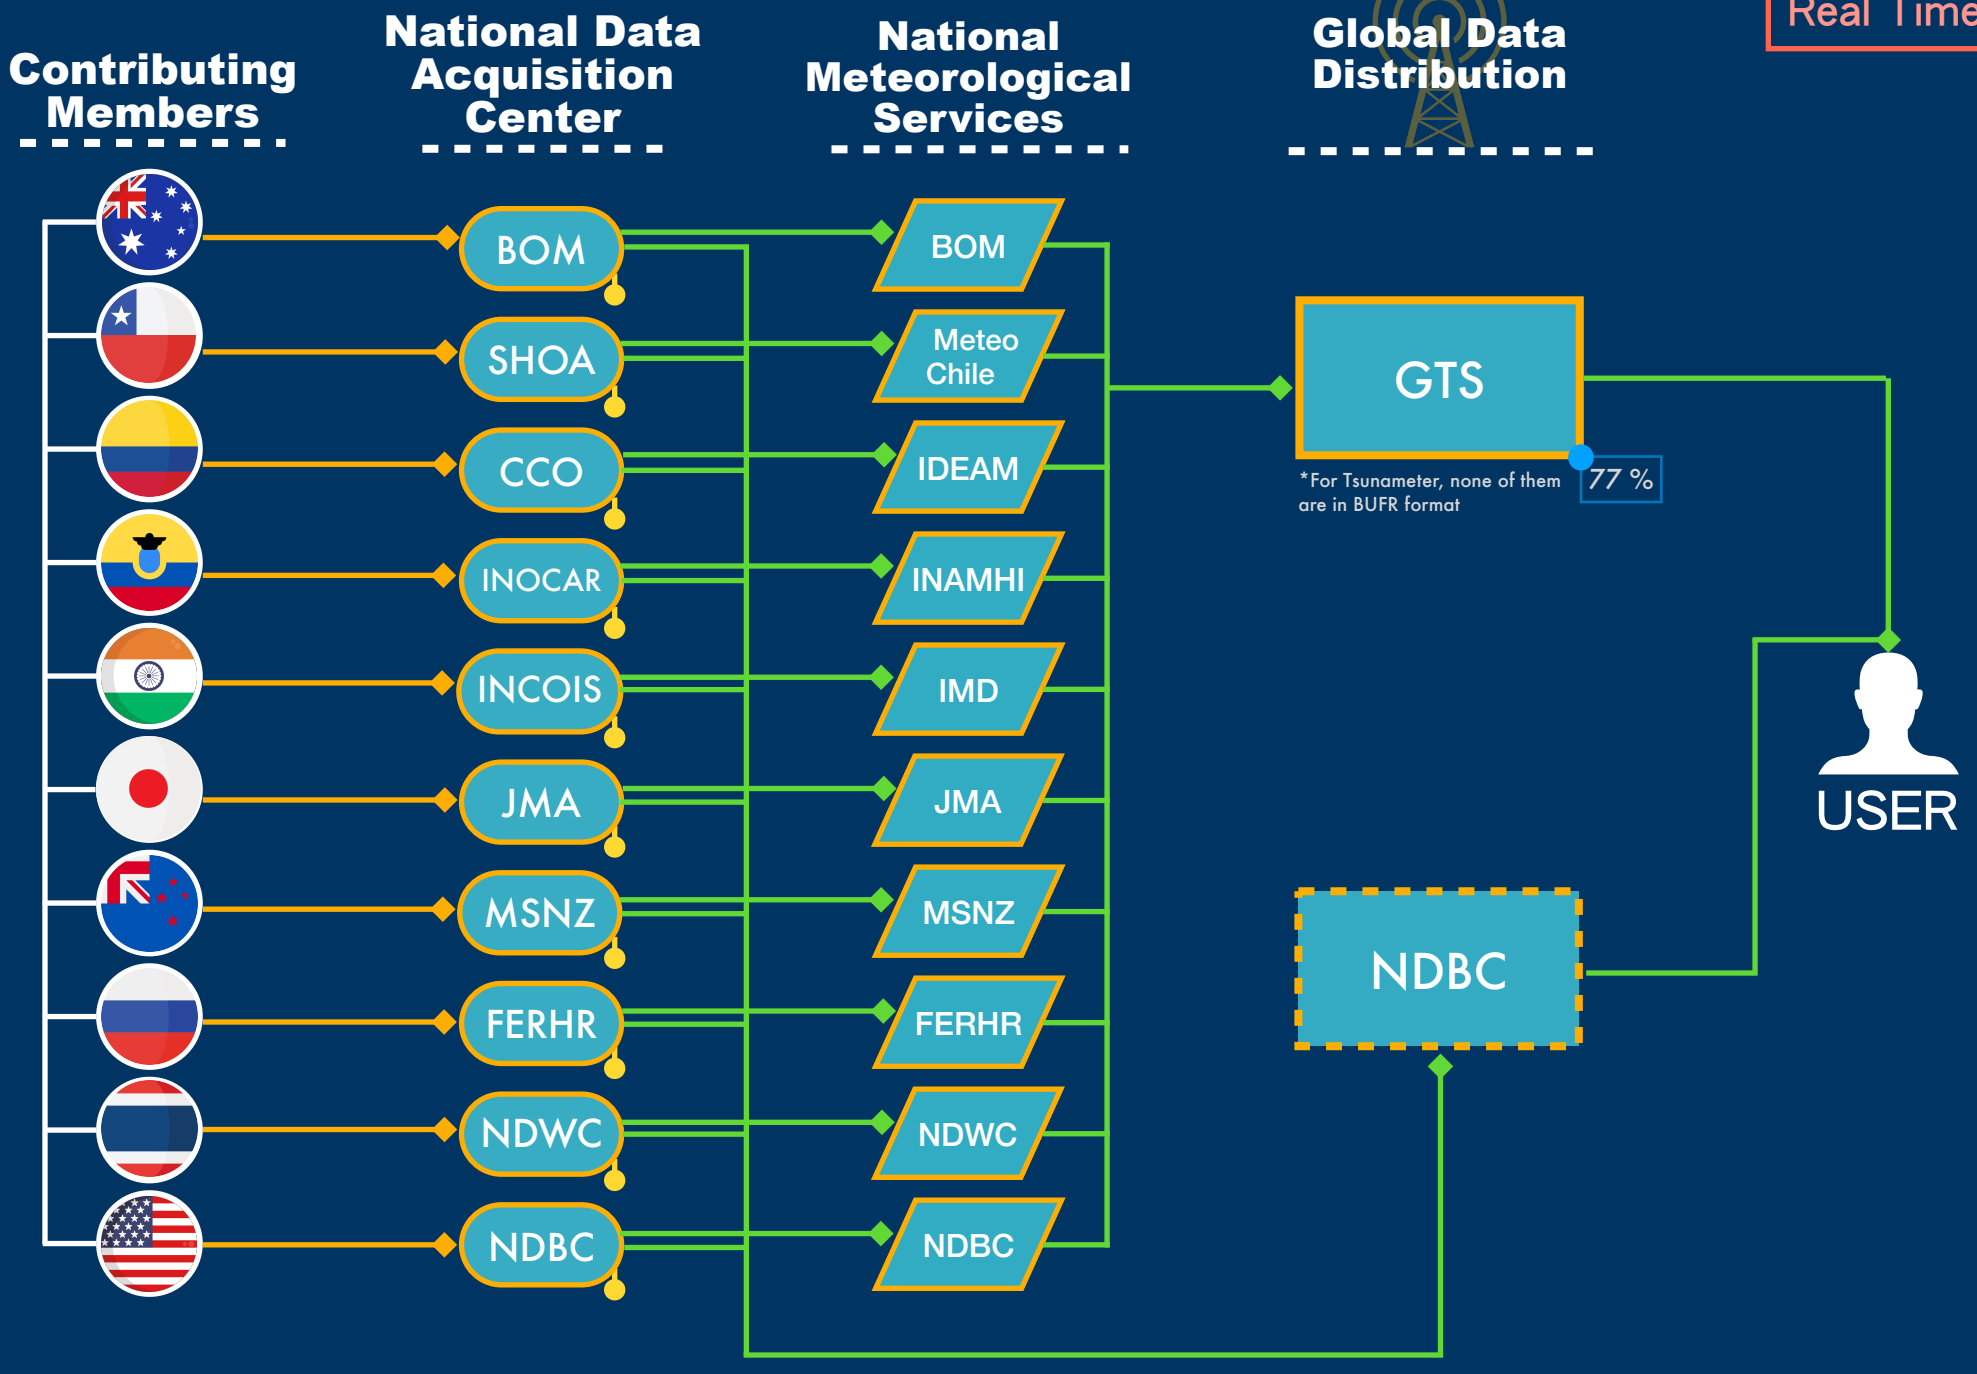

- Metadata flow - metadata feed
- Metadata flow - operational status

— % • Completeness of meta data

— • MB real time raw data flow

— • MB quality controlled real time data flow

— • Real time data available on users

Tsunami

Variables:  
SST, Sea level atmospheric pressure, Wind vector, Salinity, Waves, Air temperature, Relative Humidity

- ◆ — • Tsunami real time raw data flow
- ◆ — • Data distribution within 1hr
- ◆ — • Tsunami quality controlled real time data flow
- ◆ — • Real time data available on users
- ◆ — • Developing GDAC

\*For Tsunami, none of them are in BUFR format
