

**CARIBE EWS
Working Group IV
Article Database
Social Dimension of Disaster Risk Reduction**

Introduction

One of the actions of the CARIBE EWS Implementation plan is to integrate social science considerations into the Warning System. This preliminary database of articles focusing on the Social Dimension of Disaster Risk Reduction was prepared by the NOAA Caribbean Tsunami Warning Program in Support of Working Group IV as a contribution to this effort. While the focus was CARIBE EWS Member States, it also includes important publication from other countries. The articles were also divided by categories/disciplines: Economy, Humanities, Law, Political Science, Migration and Disaster Risk Communication.

Acknowledgements

The NOAA CTWP recognizes 2020 Pathways Student Intern, Anna Grimes, for contribution to this effort.
