EU Blue Schools project criteria

Compulsory

Develop a project
with interlinked
activities

Produce
a clear
output

Involve
all
students

Collaborate
with a
local partner

Communicate
project
results

Optional

Provide
authentic learning
experiences

Work
multi - or
interdisciplinary

Mobilise
beyond
the classroom

Foster a
land-sea
interaction

Bring in
a European
dimension

Why become a EU Blue School?

The main goals of the European Blue School program are to:

- build bridges between ocean professionals and schools
- give teachers access to resources, activities, and professional development opportunities organized by EU4Ocean Platform and Youth4Ocean – eg. Bring the Ocean into Your School MOOC, Science Projects Online Workshops (SPOWs), BlueMinds4Teachers, etc.
- set up a network where teachers can share experiences and collaborate with other schools, nationally and internationally.
- Inspiring collaboration
