

GLOSS DAWG

Participants : Anna Von Gyldenfeldt (GER), Marta Marco(ESP), Liz Bradshaw(UK), Laurent Testut(FRA)

The primary objectives of the Working Group are to:

- Identify and catalogue existing historical sea level data
- Develop and promote best practices for sea level data archaeology
- Facilitate the use of tools and methodologies to improve data recovery and digitisation efforts.
- Foster international cooperation for data digitisation initiatives.
- Provide support for funding initiatives related to data archaeology
- Support the integration of digitised data into GLOSS public repositories.

GLOSS DAWG

List of proposed actions

- Create the Steering Group regionnaly balanced
- Support from IOC to find people involved/interested in DA (Especially in India, Russia, South America, Africa, Asia)
- Choose a lead + co-lead in the Steering Group
- Write a the Terms of Reference of the WG (almost done !!)
- Any formal procedure for the creation of the WG ?

GLOSS DAWG

Expected Deliverables

- Inventory of historical sea level data.
- Best practices guide for data archaeology.
- Technical report on available tools and recommended workflows.
- Report to GLOSS Group of Experts.
- List of publications and outreach material hosted on the GLOSS website.
- List of contacts relevant to data archaeology.
